

PARTICIPANT PROGRESS LOG

Name of Participant

	1.	2.	3.	4.	5.	6.	7.	8.	9.	10.
Removing Disposable Latex-Free Gloves										
Clothes Drag										
Blanket Drag										
Shoulder Drag										
Ankle Drag										
Firefighter's Drag										
Firefighter's Carry										
Pack-Strap Carry										
Walking Assist										
Two-Person Seat Carry										
Direct Ground Lift										
Extremity Lift										
Primary Assessment										
Opening the Airway—Head-Tilt/ Chin-Lift Maneuver										
Jaw-Thrust (Without Head Extension) Maneuver										
Using a Resuscitation Mask—Adult, Child and Infant										

(Continued)

Name of Participant

	1.	2.	3.	4.	5.	6.	7.	8.	9.	10.
Using a Resuscitation Mask—Head, Neck or Spinal Injury Suspected: Jaw-Thrust (Without Head Extension) Maneuver—Adult or Child										
How to Obtain a SAMPLE History										
How to Perform a Secondary Assessment for a Responsive Trauma Patient										
Physical Exam										
How to Obtain Baseline Vital Signs										
Taking and Recording a Patient's Blood Pressure (by Auscultation)										
Taking and Recording a Patient's Blood Pressure (by Palpation)										
Giving Ventilations—Adult and Child										
Giving Ventilations—Infant										
Giving Ventilations—Head, Neck or Spinal Injury Suspected: Jaw-Thrust (Without Head Extension) Maneuver—Adult and Child										
Giving Ventilations Using a Bag-Valve-Mask Resuscitator—One Responder										
Giving Ventilations Using a Bag-Valve-Mask Resuscitator—Two Responders										
Using a Mechanical Suctioning Device										
Using a Manual Suctioning Device										
Inserting an Oral Airway										
Choking—Adult and Child										
Choking—Infant										
Oxygen Delivery										
CPR/AED—Adult										
CPR/AED—Child										
CPR/AED—Infant										

(Continued)

Name of Participant

	1.	2.	3.	4.	5.	6.	7.	8.	9.	10.
Two-Responder CPR—Adult and Child										
Two-Responder CPR—Infant										
AED—Adult, Child and Infant										
Administering an Epinephrine Auto-Injector										
Using Direct Pressure to Control External Bleeding										
Using a Commercial Tourniquet with a Windlass										
Applying a Rigid Splint										
Applying a Sling and Binder										
Applying an Anatomic Splint										
Applying a Soft Splint										
Controlling Bleeding from an Open Head Wound										
Bandaging an Eye with an Injury from an Impaled Object										
Caring for Foreign Bodies in the Eye										
Spinal Motion Restriction Using Manual Stabilization										
Immobilizing a Head, Neck or Spinal Injury										
Final Practical Scenario 1: Patient Assessment and Management										
Final Practical Scenario 2: Airway Management and Breathing Devices										
Final Practical Scenario 3: Bleeding Control and Shock Management										
Final Practical Scenario 4: Immobilization of Muscle, Bone and Joint Injuries										
Final Practical Scenario 5: Combined Skills										
Emergency Medical Response Final Written Exam A/B										
Basic Life Support for Healthcare Providers Final Written Exam A/B										

Instructor's Note: *The skills may need modification for participants with disabilities or other conditions. This awareness challenges instructors to focus on the skill components that are needed to successfully complete an objective, as opposed to perfecting every facet of the skill. Always teach to the standard, but be aware that participants may modify how a skill is accomplished and still meet the objective. Test participants' skills accordingly.*

All skill sessions include practicing with appropriate standard precautions, such as using a resuscitation mask and disposable latex-free gloves.
